

6516206142.txt

XM provides its customers with a service whose value greatly exceeds the cost of their service. They are simply trying to give their loyal customers even more for their money. The NAB should have absolutely no say at all in this issue. They are simply trying to squash a legal and superior competitor. If the NAB valued their listeners in the same manner that XM did, they would not be losing their audience in the first place. Please support fair competition and dismiss petition 04-160.
